10,7 cm / 21 gr / topwater

Rolling side to side as it walks, exposing the sides of the lure as it slides left to right sending flashes into the water below, calling in the predators. This flash also allows the predators to hone in on the lure easier leading to more hook ups during the strike. The Rapala Precision Xtreme Pencil has a wire through construction providing anglers with confidence to target larger more aggressive predators. Featuring a dual frequency knocker inside the lure to produce a unique sound and provide maximum cast distance and accuracy. Finished off in 3D high quality colours to suit a wide range of environments and conditions.

Precise Design – Xtreme Action! Inside the Precision Xtreme Pencil’s durable and through-wired plastic body is an internal weight system that makes the lure one of the best-casting baits in its category. The internal weight doubles as the Dual Frequency Knocker: as the weight slides along the internal railing, it hits a durability-increasing plastic pillar and a stainless steel weight in turns. This results in a sequence of high and low pitch, attracting fish from near and far! The extremely detailed Precision Xtreme Pencil Saltwater features printed scales, a new 3D holographic eye, and comes in 12 vivid saltwater prey patterns.
