Opis / Description

Sharp Spin is designed to raise the bar, individually handcrafted and tuned, built around a heat-treated super-wire, stronger than traditional wires, delivering a straight action and avoiding torque even at high retrieval speed.

Available in multiple weights, colours and blade solutions, with incredible attention to quality during the whole production stages, featuring a fine tune skirt for an improved flowing action, lifelike head design with large 3D eyes, while blades are fitted over quality swivel for a smooth rotations and a fantastic action also on the fall or at slow retrieve.

WILLOW COLORADO

The combination between the blades helps to get the best of the two worlds, moving a huge amount of water even on slow retrieval speed, creating flashes and vibrations predators can't resist. Allowing the angler to remain on the strike zone longer, ideally suited to fish on weed cover or close to structures also in dark water.

Sharp Spin su ružno rađeni i testirani spinnerbaiti napravljeni od najjače žice zbog čega su snažni i ne savijaju se ni pri najbržem povlačenju. Dostupni su u nekoliko težina, boja i oblika krilaca, s krasnim suknjicama i ribolikim glavama s velikim 3D očima te kvalitetnim vrtilicama. Zbog svega toga Sharp Spin spinnerbaiti imaju odličnu rotaciju i

plivaju?u akciju.

Willow Colorado kombinira 2 oblika krilca te izvla?i najbolje od svakog od njih. Manje krilce i pri sporom povla?enju gura veliku koli?inu vode ispred sebe, a veliko krilce daje vibraciju i odbljesak kojima predatori ne mogu odoliti. Sporije vo?enje omogu?uje da varalica du?e ostane u željenoj zoni što je neophodno kod ribolova u zatravljenoj ili mutnoj vodi te u sumrak.
