Opis / Description

Intech Tournament Longaff DFV-23SB - is the highest quality double hook, co-developed by Intech with the world leader in the industry, the Japanese company Vanfook. The point at the hook is forged with a chemical sharpening - it has exceptional sharpness and reliability. The hook is made of high modulus, springy steel, has an elongated forend and a protective PTFE coating, which reliably protects against corrosion and improves penetration properties. The correct shape of the bend allows you to securely hold the fish on the hook. Wide range of hooks - suitable for equipping any lure from 2.5 to 6 inches.

Double Longaff DFV-23SB - thanks to its wide bend, it makes it easy and efficient to equip wide-body and massive baits. Leaving a sufficient distance from the tip to the forend, for 100% implementation of bites.

The extended forend of the Intech Tournament Longaff double gives an indisputable advantage, allowing you to place the hook with the tip exit in the middle and closer to the tail of the bait, which significantly increases the implementation of bites and eliminates unpunished tail bites from the bait.
