

Intech Tournament Micro Style PE X4 150 m

Proizvođač / Brand: Intech
Šifra proizvoda / Code: 55713
Raspoloživost / Availability: Na zalihi / In Stock

Cijena / Price: ~~18,50€~~ 16,65€

Opis / Description

Intech Tournament Micro Style is the perfect embodiment of innovative technologies, Japanese quality and affordable price. Thanks to Intech's close cooperation with the Japanese manufacturer, it was possible for the first time to obtain a premium braided line, but at a much lower price among similar offers. Tournament Micro Style is really thin braid, it is one of the strongest in its class. The manufacture uses the progressive raw materials of the IZANAS, popular in the production of top-line braids used by such giants as Sunline, YGK, X-Braid, Gosen, etc.. This material has a number of advantages: high strength, resistance to abrasion and UV exposure, low specific gravity etc. The use of microstepping technology of weaving made it possible to obtain a tightly braided line, which is characterized by the highest sensitivity due to a low degree of elongation and a smooth structure that allows to achieve an increase in casting distance, and abrasion resistance allows the braid to be used in the most difficult fishing conditions. In microjig fishing, the highest demands are made on the line, which the Tournament Micro Style line meets 100%. A wide range of sizes from # 0.175 allows you to comfortably use it when fishing with a nano jig, and # 0.5 can be safely recommended for light delicate fishing for a passive predator.

size	#0.175	#0.25	#0.3	#0.4	#0.5
mm	0.069	0.083	0.090	0.104	0.117
lb/kg	3.5/1.5	5/2.27	6/2.72	8/3.63	10/4.5

The use of microstepping technology of weaving made it possible to obtain a tightly braided line, which is characterized by the highest sensitivity due to a low degree of elongation and a smooth structure that allows an increase in casting distance, and abrasion resistance allows the braid to be used in the most difficult fishing conditions. In

microjig fishing, the highest demands are made on the line, which the Tournament Micro Style line meets 100%.

The progressive raw materials IZANAS are used in the production, which is popular in the production of top lines of braids used by such giants as Sunline, YGK, X-Braid, Gosen, etc. IZANAS raw materials have a number of advantages:

1. High linear strength.

The ability to use a thinner diameter than existing braid fibers while maintaining the same load carrying capacity.

2. Lightness.

Density 0.97 g / cm 3 IZANAS ™ is one of the lightest materials.

3. High modulus of elasticity.

Since the material has a high modulus of elasticity, the angler can feel the most delicate touch of the fish.

4. Durability

IZANAS ™ has the best abrasion resistance of organic fibers with the lowest stretch ratio.
