Opis / Description

The Needle Jig is the perfect metal imitation of a needlefish. The long, slim body will cast a mile and has very little resistance in the water. The geometric profile makes the lure shimmer and flash on the fall, sliding and rolling away from the retrieve line. This sends out flashes and vibrations in a very erratic movement pattern. The body has a built-in steel rattle that sends out a loud click sound when jigging, helping to attract predator fish from distance. The Needle Jig has a hybrid action and can be used equally effectively for vertical jigging, shore jigging, cast jigging and slow jigging.
