

Gosen Answer Casting X16 150 m

Proizvođač / Brand: Gosen

Šifra proizvoda / Code: 27726

Raspoloživost / Availability: Na zalihi / In Stock

Cijena / Price: 59,00€

Opis / Description

A 16-strand braid is made up of thinner fibers and is denser than an 8-strand braid (see the image below). Compared to our 8-strand braided line, the number of filaments is 1.5 times greater, resulting in a smoother surface, and the number of pitches is 1.3 times greater, increasing structural stability. This increases the strength value and achieves a higher level of strength.

The 16-strand braid makes the surface of the line smooth and increases flight distance! GOSEN's unique "SG processing" creates "tightness" and "body" for excellent operability.

Adopts a pink color that is highly visible under all conditions, from day to night.

PE	mm	lb	kg
0.8	0,148	20	9,1
1.0	0,165	23	10,5
1.5	0,205	33	15,1
2.0	0,235	41	18,5
