Proizvođa / Brand: Bait Breath

Šifra proizvoda / Code: 754364

Raspoloživost / Availability: Na zalihi / In Stock

Cijena / Price: ~~7,75€~~ 6,98€

Opis / Description

6 pcs in pack

The TTShad is one of the best, if not the best shad tail lures available. This creation from the Japanese manufacturer Bait Breath has conquered many countries where there is perch, pike or zander. We also have TTShad regularly breaking catch records, topping all sorts of top ratings of the best lures over and over again. TTShad is made of soft, but at the same time durable edible material, which contains unique food components and attractants (patented formula BYS Mix Flavor), which have the most vivid effect on the predator. The body of TTShad is voluminous and fleshy, which in the eyes of the fish looks like a tasty and protein-rich food. Ribs-nodules on the body are designed, on the one hand, to enhance the effect of vibrations during hauling, and on the other hand, they stimulate the predator to keep the bait in the mouth longer. The wide triangular blade-tail is connected to the body by a very elastic and durable partition, allowing the TTShad to produce stable, clear and extremely seductive vibrations for a predator at any speed of movement.

Play Bait Breath TT Shad starts at the slightest pull, demonstrating stable low-frequency sinusoids. As the speed of movement increases, the frequency of beats also increases and the bait becomes visible to the predator from an even greater distance. The best wiring for Bait Breath TTShad is considered to be "uniform", smooth pulls and especially the "step" with all its derivatives. TT Shad is simply the perfect lure for pike, walleye and large perch!
