

Libra Lures Embrion Shad 8" (20 cm)

Proizvođa / Brand: Libra Lures

Šifra proizvoda / Code: 704016

Raspoloživost / Availability: Na zalihi / In Stock

Cijena / Price: 8,00€

Opis / Description

60 gr

1 pc in pack

Embrion Shad – is a special project that kept us awake for many nights. Fortunately, our dedication to excellence, experience, and a method of trial and error paid off. We've created a meticulously crafted lure that performs exceptionally well both during the most popular fishing method, i.e., the drop shot technique, but also during the heart-pounding deepwater fishing. The unique color scheme will surely be appreciated by pike hunters. Embrion Shad features a body with a distinct, almost swollen abdominal section. This shift in the center of gravity guarantees an unconventional, enticing action. Complementing it is the narrowing of the tail section, before the wide paddle tail.

- CLASSICAL JIG HEAD OR TUNGSTEN - hook size #12/0, weight 10 - 35 g.
- CLASSIC JIG HEAD + RE-RIGGING - hook size #8/0 + treble hook #1/0 - 2/0, weight 10 - 35 g.
- HEAD SCREWED + RE-RIGGING - weight head 5 - 25 g + treble hook #1x2, weight 10 - 35 g.

BAITS 7"-8" – spinning or casting rod with a length of 198-240 cm with a realistic casting weight of 80-130 g depending on the size of the used bait loads and the depth of bait presentation. Reel size 4000-5000, braided line 0.18-0.23 mm, which allows for a safe and short fight with the fish, and fluorocarbon leader 0.9 mm - this is a safe diameter and resistant to the sharp teeth of pike.
