Opis / Description

15 gr

Embrion Shad – is a special project that kept us awake for many nights. Fortunately, our dedication to excellence, experience, and a method of trial and error paid off. We've created a meticulously crafted lure that performs exceptionally well both during the most popular fishing method, i.e., the drop shot technique, but also during the heart-pounding deepwater fishing. The unique color scheme will surely be appreciated by pike hunters. Embrion Shad features a body with a distinct, almost swollen abdominal section. This shift in the center of gravity guarantees an unconventional, enticing action. Complementing it is the narrowing of the tail section, before the wide paddle tail.
