Outstanding water displacement! The amazing fishing worm is now even more powerful! The amazing fishing straight worm, the Vein, has been reborn with a variety of added power.

Bait-Breath tournament anglers have come together to finally create the ultimate straight worm - VEIN POWER PLUS.

Vein, which has been the core of bait-breathing straight worms for many years, now has a derivative model, the Vein Power Plus.

While the original Vein was known for its gentle action the Vein Power Plus was designed to push water even further.

Rather than simply redesigning it to be thicker, we've thoroughly rebalanced the material hardness and the amount of BYS MIX (a fish attractant) and salt content to improve hook retention and enhance its scent, while also achieving the resistance (water displacement) that is arguably the most important performance feature of a straight worm.

Its performance expands the range of rigs and tackle it can be used with, allowing for delicate approaches with spinning and bait finesse, as well as outstanding presence in cover.

The "VEIN POWER PLUS" is the new standard straight worm that is compatible with the ever-diversifying rigs and tackle of the times.

Recommended rigs: Neko rig, wacky rig, leaderless downshot, Texas rig, etc.
