2 pcs in pack

Surfstrand Micro Ultra 1×19 — improved flexibility and natural lure presentation

AFW Surfstrand Micro Ultra 1x19 is a strand made of 19 braided stainless steel wires, providing corrosion resistance and high strength. The main advantage of this series of materials is its excellent abrasion resistance, allowing anglers to target predators like pike and catfish without the risk of lure bite-offs.

The material AFW Surfstrand Ultra Micro 1x19 is a budget-friendly option compared to Micro Supreme 7x7. Compared to 1x7 formulas, the 1x19 version is noticeably more flexible, providing even more realistic lure action and superior performance in terms of breaking strength, memory retention, and stretch. The material offers excellent kink resistance and high tensile strength, all while maintaining a very small cross-sectional diameter. Its rust resistance makes this leader material extremely reliable for frequent fishing in waters with varying chemical compositions. The excellent camouflage color Camo minimizes reflections and is barely visible underwater. Swivels and snaps can be attached using crimping sleeves or tied with special knots.

AFW (American Fishing Wire) is globally recognized for its:

- Exceptional tensile strength
- Corrosion resistance
- High durability and stability
- Perfect behavior in predator fishing setups
