### Opis / Description

17,5 cm / 50 gr

**Perch Shad 5" i 7"** – designed for fishing for predators in open water and during the so-called “fall” (sinking phase). Thanks to its visual characteristics, the model very accurately imitates the basic food of zander and pike, which also have perch as a staple in their diet. In the eyes of a predator, PERCH removes all its suspicions and, with its distinctive action, triggers it to attack.
