

Intech Tungsten 74 Flex Head Gold

Proizvođa / Brand: Intech

Šifra proizvoda / Code: 55905

Raspoloživost / Availability: Na zalihi / In Stock

Cijena / Price: 2,00€

Opis / Description

pcs	size (gr)
4	0,5 / 0,7
3	1 / 1,2 / 1,5 / 1,7
2	2 / 2,5 / 3 / 3,5
1	4 / 5 / 6 / 7 / 8 / 10

When designing tungsten weights Intech, the task was simple: Make the best of existing disassembled "ear". In the great similarity loaded by various manufacturers, they have a lot of differences in shape, coating, rigidity and configuration of wire fittings, and of course the density of tungsten itself. In Intech weights all this is optimized taking into account long-term experience of tungsten operation, hundreds of fishing, dozens of tournaments on sports spinning. The shape of the weight is the perfect ball. Only such tungsten has the best aerodynamics, it flies farther and more precisely the load of the same mass, but sprayed on the sides. Tungsten is equipped with high-quality stainless wire, the shape of the pelvis in the body was loaded perfectly. Fasten the ear of the hook into the bracket easily, it enters the ball without additional compression, easily and clearly. The gold color of tungsten perfectly distinguishes the bait, which is an undoubted advantage when fishing first of all pike and zander.

The gold color of tungsten gives additional glare - it best allows to single out the bait, attracting the predator from a long distance. Th

e best result is the use of gold tungsten when hunting a ship and pike, and not only in conditions of low water transparency.
