

Varivas Super Trout Advance 100 m

Proizvođa / Brand: Varivas

Šifra proizvoda / Code: 58711

Raspoloživost / Availability: Na zalihi / In Stock

Cijena / Price: 9,50€

Opis / Description

Advanced trout fishing line. In order to sense motion in the line including subtle hits you need a trout dedicated line with a high visibility. By adopting the line color during low light even anglers can understand the movement and feel of the line. The VA-G process of VARIVAS original helps you manage your fishing, from mountain streams right down to raging rivers.

- Varivas' VA-G process: high density molecular binding improves breaking strain / diameter ratio, resulting in 1-rank-higher comparing with other same diameter.
- High camouflage line color, misty-brown, blends well with the background. It is camouflage color with the least contrast against background for minimal visibility from nervous fish.
- SP-T Coating: Varivas' super tough coating, not only increased durability but also flexibility. It also improved such a great cast-ability and lures' operability.

Color? Flat Brown
