Proizvo?a? / Brand: Bait Breath
Šifra proizvoda / Code: 754171
Raspoloživost / Availability: Na zalihi / In Stock

Cijena / Price: 6,50€

Opis / Description
8 pcs in pack

The BeTanCo series has a good reputation for its actual fishing ability, which covers everything from fishing to boat locks and flat fish. The origin of the name is that it is similar to the goby bait, commonly known as "BeTanCo", which is a local rock fish bait, and we repeatedly develop trial production and actual fishing test at that time. In doing so, the bait breathside has virtually no decision-making power due to the one-sided name given by Mr. Utsumi, the captain of the fishing boat "Yukimaru" who cooperated with us.

Body features:

- The flat body design, which has never been seen before in the shad tail, reproduces a realistic form.

- The flat body side provides a flushing effect. In addition, the back fin and tail fin also have a flushing effect.

- Rough grain processing is applied to the skin of the worm to reproduce the exquisite feel.

- Nine bosses on each side generate waves.

- The body is designed to cause roll action.

- Since the vibration of the shad tail moves from low speed pull to high speed pull with super soft material, from stay to retrieve. Continue to fascinate the target.

- The silhouette is designed with the image of bait fish such as gobies and sculpins.

- Shrimp, krill, fishmeal, amino acids, etc. contained in BYS MIX FORMULA kneaded into the material
Attract the target!

Recommended: Texas rig, Jig head, etc.

Recommended action: Lift and fall, slow retrieve, repeat stay and retrieve, etc. with the above rig
