Opis / Description

7 pcs in pack

The long body with a thin tail ending in a horizontal lance-shaped fin, plus the precisely selected material provide a subtle movement in the tail, perfectly mimicking that of small fish. At the same time, the touch feel is realistic, and the thin profile suits every predatory fishes plate.

When combined with the special BR Head the shape of the Bay Ruf Fish allows for two styles of fishing. Erratic darting action when the flat side is facing up, or side to side motion with the flat side rigged downwards.
