Opis / Description

BRAIDED "PE" LINE / 100% Made in Japan / COLOR: Invisible Blue

The special coating process allows it to enter the surface of the line and the gaps between the fibers, and it stays longer. It reduces the coefficient of friction, and at the same time maintain durability and usability which is moderate tension. It is a new coating process that improves durability and strength as well as cast distance. 61% reduction in frictional resistance.

New "ALB construction" is made as shorter-pitch braided so that it doesn't let water enter the gaps of the line, and it prevents deterioration. Also, due to shorter-pitch braided, it gets the line more durable, and at the same time strong enough to avoid breaking the line because of snagged.

Size / mm	Size / PE	Strength / kg	Strength / lb
0,10	0.6	4,5	10
0,12	0.8	6	13
0,13	1.0	7,6	17
0,15	1.2	9,1	20
0,17	1.5	9,9	22
