Proizvo?a? / Brand: Bait Breath
Šifra proizvoda / Code: 754404
Raspoloživost / Availability: Na zalihi / In Stock

Cijena / Price: 8,00€

Opis / Description
8 pcs in pack

Curly Grub is a super popular edible twister from Bait Breath, made in Japan but designed and tested on european waters by FishingStock experts and athletes. Despite the wide catalog of Bait Breath, the Japanese just did not have a bait in the form of a long-tailed twister. But this is one of the key points for us. It took more than one year to create and bring to perfection Curly Grub, which is now a virtual bestseller, leaving neither pike nor perch with zander indifferent to itself. Without any exaggeration, Curly Grub is now the top bait in the top class.

Moderately voluminous and slightly corrugated body Curly Grub turns into a very elastic and interestingly twisted tail, the surface of which is made in the form of honeycombs. This solution made it possible to achieve stable and stable play from the bait at the lowest speed and in fact with any weight of the load. The segmented body of Curly Grub, once in the mouth of a predator, creates a full-fledged illusion of living prey, which makes no sense to get rid of. On wiring, Curly Grub demonstrates relatively sweeping low-frequency vibrations, attracting a predator from a long distance. At the same time, this miracle twister showed simply phenomenal catchability for passive specimens. Flawless in the free-fall stage, perfect for any stepping, uniform and even jumpy animations.

Curly Grub is absolutely compatible with swivel rigs, jig heads, offsets, single hooks, doubles or trebles. The Curly Grub is a super catchy twister, perhaps the best in its class.
