

Varivas Avani Eging Max Power PE X9 150 m

Proizvođa / Brand: Varivas

Šifra proizvoda / Code: 58732

Raspoloživost / Availability: Na zalihi / In Stock

Cijena / Price: 40,00€

Opis / Description

PE	Max lb
0.6	14
0.8	18
1.0	23

Stunning sensitivity and optimal stiffness will change your Eging/squid fishing!

??CORE-INPUT method -X9 structure

The CORE-INPUT method achieves optimal stiffness and superior durability. The appropriate level of stiffness significantly reduces line troubles such as guide wraps and wind knots, making it suitable for intense, continuous squid jigging sessions all day long.

??Vertical Braid method

The Vertical Braid method achieves exceptional linear strength and an ultra-low stretch rate of just 3%. This ultra-low stretch can precisely convey even the slightest bites from small squid accurately to the angler. Furthermore, its outstanding linear strength minimizes the effects of currents and wind, enhancing cast accuracy.

??SP-TII coating

The line surface is coated with the SP-T? coating, which encapsulates it in a resin layer. This significantly enhances durability and makes the line resistant to water absorption. The improved water-shedding capabilities enable sharp jigging action, boosting lure maneuverability and responsiveness.

??A “falling bite marker” is equipped

By incorporating a highly visible marking system, it will allow you to track the movement of the lure by way of the line's motion, facilitating precise squid jigging. It's perfectly tailored for squid fishing.
