Fish scent

Embrion Twist Tail – our variation on the popular twister. We've combined a large, wide-waving, fleshy tail with the swollen body of the Embrion Shad. As a result, we've achieved a lure that works both the body and tail sections right from the start and at the slowest retrieves. Special shading on the tail section ensures the generation of a hydroacoustic wave in any conditions, enticing even the most sluggish and finicky fish to strike. We're confident that even the smallest sizes will be surefire hits for trout and perch anglers. Embrion Twist Tail is available in four sizes, ranging from 1.75 to 7 inches, or 4.5 cm to 18 cm.

- CLASSICAL JIG HEAD OR TUNGSTEN - hook size #6 - 8, weight 1 - 5 g.
- CHEBURASHKA STRAIGHT HOOK - hook size #6 - 8, weight 1 - 7 g.
- DROP SHOT - hook size #8 - 10.
- SIDE STRAP - hook size #6 - 8.

BAITS 1.75"-3" – spinning or casting rod with a length of 180-213 cm when fishing from a boat or longer when fishing from shore, with a realistic casting weight of up to 15 g for finesse fishing and in water depths not exceeding 5-7 m. For greater depths or when using heavier jig heads than 10 g, it is recommended to choose a rod with a casting weight that meets our expectations during bait presentation. Reel size 2000-3000, braided line 0.04-0.08 mm, and fluorocarbon or monofilament leader 0.12-0.14 mm or a delicate

and subtle tungsten leader up to 5 kg.
