Turbo Worm Mini – a stocky yet ribbed body of the Turbo Worm ensures that this theoretically simple lure has an incredibly strong effect on fish. This bait generates a powerful hydroacoustic wave and, due to its large surface area, serves as an excellent carrier of aromas. The “mini” version is 35 mm long, and we must honestly admit that it is our pride, as it is a small technological masterpiece. Creating such a small yet structurally complex lure was no easy task, but these are the challenges we love!
