Cijena / Price: 50,00€

Opis / Description

ALTA UNIA spinning rods are a basic series of specialized new generation spinning rods. Alta Unia look strict, minimalistic and stylish at the same time - while having all the necessary working qualities thanks to the developments and experience of FishingStock Team. The Unia series is functional, reliable and designed taking into account the specific conditions of predatory fishing, the model range is so wide that it is possible to cover all possible types of spinning fishing with one Unia series.

A distinctive feature of the series is the quality of the blanks and components. Alta Unia blanks are made of Korean carbon prepreg SkyFlex 30T due to which they have a good competitive weight and sensitivity at the level of the top segment. SkyFlex30T is a carbon prepreg produced by the Korean concern SK with a modularity of 30 ton. ALTA spinning rods can be safely compared with blanks of more expensive rods, because in terms of price and characteristics we are ahead. The rings are made of ZrO2 Slim material, which is a high-quality analogue of Torzite. The reel holder is WeBo. All these components have proven themselves ideally on spinning rods of the budget price category, there are no analogues on the market yet. The spinning rod has a fast and extra-fast action depending on the power and length of the model. But this action is unique in its own way, because it does not require laying with hands and the body, such a action allows you to deliver the assembly to an ultra-long distance without unnecessary effort. The simple design made it possible to make the Alta Unia spinning rod affordable without losing functionality. The handles of the spinning rods and a convenient reel seat lie correctly and comfortably in the hand, and the rings with thin inserts are located in accordance with the KR concept.

Sustainable design of Alta Unia brand products were provided by the FishingStock Team, which includes qualified anglers for whom spinning fishing is not a hobby, but daily

work: important tournaments, expeditions, work as fishing guides. The product is intended for every spinning angler, because it has a budget price and characteristic features of high quality workmanship. The tactical data of Alta Unia spinning blanks, casting properties, tactile sensitivity, perfection of the action in accordance with their specific purpose - are brought to complete perfection in this price segment, while all models combine practically incompatible features - amazing sensitivity, lightness, tangible reserve.
