

Bait Breath Nami-Kyu 3,5" (9 cm)

Proizvođa / Brand: Bait Breath

Šifra proizvoda / Code: 75442

Raspoloživost / Availability: Na zalihi / In Stock

Cijena / Price: ~~5,25€~~ 4,73€

Opis / Description

4 pcs in pack

Nami-Kyu lure have the shape of a vibrotail with a club-shaped tail fin. The thin, graceful partition connecting the relief body of a pyramidal shape with the tail actually turns out to be very tear-resistant. Thanks to this solution, with uniform wiring, the play of the tail fin becomes more sweeping, aggressive and spreads low-frequency vibrations over a greater distance, attracting possible prey. However, by switching to a heavier load and playing the bait with sharp short jerks, followed by a free fall to the bottom, the angler can achieve a different play of the tail with a significant increase in the acoustic effect. An improved formula of the material with an attractive smell and a perfectly matched size can tempt both small predators and trophy-sized individuals. For the convenience of attaching the bait to the offset hook in the body of the Nami-kyu, the developers of the Bait Breath company have provided a special groove.

This Bait Breath lure serie is a Feco certified product that uses environmentally friendly materials. All worms are approved for use in eco-tournaments hosted by JB and NBC.
