

Alcedo Micron

Proizvođa / Brand: Akami

Šifra proizvoda / Code: 78202

Raspoloživost / Availability: Na zalihi / In Stock

Cijena / Price: 45,00€

Opis / Description

This fishing reel is an ideal option for spinning enthusiasts, but also offers excellent performance in other fishing techniques, making it versatile in both fresh and saltwater. Thanks to its sturdy construction, it withstands even the most demanding conditions, ensuring reliability and durability.

The spool is made of high-quality anodized aluminum, a material that is not only lightweight but also provides excellent corrosion resistance—essential when fishing in marine environments, known for their high salinity and tendency to deteriorate materials over time. This anodized coating protects the reel from wear and rust, ensuring it maintains its original performance even after prolonged use.

One of the key features of this reel is the sealed drag, a system designed to prevent water and dust from entering, keeping the internal mechanisms clean and functional. Moreover, the drag allows you to manage fish of various sizes and strengths with maximum control. The reel is equipped with shielded Japanese bearings, renowned for their precision and durability. These bearings enhance the smoothness of rotation, making each cast and retrieval a fluid experience, even with heavy loads.

The reel body is made of aluminum alloy, a robust and lightweight material that provides a perfect balance of durability and maneuverability. Its structure is designed to withstand high tension without deformation, making it strong and reliable even under pressure. Additionally, it features a carbon multi-disc braking system, ensuring consistent and progressive braking action, especially useful when reeling in larger, more challenging fish.

Another strength of this reel is the infinite anti-reverse system, a technology that prevents

the handle from rotating backward, improving control and precision during retrieval. This functionality allows anglers to have full control over the action, eliminating any unwanted play.

The handle is designed to provide an ergonomic, non-slip grip, reducing fatigue during long fishing sessions. This detail is essential for those who spend many hours fishing and need comfort and stability. The firm and secure grip allows applying all necessary strength in difficult situations without losing hold.

Designed for experienced anglers, this reel is an excellent choice for those seeking high performance and reliability. Thanks to its advanced technical features, it perfectly meets the needs of the most demanding anglers, offering exceptional control in every fishing scenario.

Size	Ratio	Bearings	Weight	Max Drag	Line Capacity
1500	5,2:1	4+1	195 gr	5 kg	0,16/150
2500	5,2:1	4+1	200 gr	6 kg	0,18/200
